

STATE OF MISSOURI
DEPARTMENT OF NATURAL RESOURCES

MISSOURI AIR CONSERVATION COMMISSION

PERMIT TO CONSTRUCT

Under the authority of RSMo 643 and the Federal Clean Air Act the applicant is authorized to construct the air contaminant source(s) described below, in accordance with the laws, rules and conditions as set forth herein.

Permit Number **03 2 006 - 011**

Project Number: 2006-01-015

Owner: Chinn Feed, LLC

Owner's Address: 3937 Highway 151, Clarence, MO 63437

Installation Name: Chinn Feed Mill

Installation Address: East of Clarence North of Hwy 36, Clarence, MO 63437

Location Information: Shelby County, S16, T57N, R12W

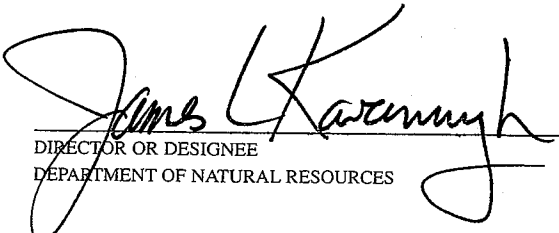

Application for Authority to Construct was made for:

Installation of a animal feed mill. This review was conducted in accordance with Section (5), Missouri State Rule 10 CSR 10-6.060, *Construction Permits Required*.

-
- ☐ Standard Conditions (on reverse) are applicable to this permit.
- ☒ Standard Conditions (on reverse) and Special Conditions (listed as attachments starting on page 2) are applicable to this permit.

MAR 17 2006

EFFECTIVE DATE

DIRECTOR OR DESIGNEE
DEPARTMENT OF NATURAL RESOURCES

STANDARD CONDITIONS:

Permission to construct may be revoked if you fail to begin construction or modification within two years from the effective date of this permit. Permittee should notify the Air Pollution Control Program if construction or modification is not started within two years after the effective date of this permit, or if construction or modification is suspended for one year or more.

You will be in violation of 10 CSR 10-6.060 if you fail to adhere to the specifications and conditions listed in your application, this permit and the project review. Specifically, all air contaminant control devices shall be operated and maintained as specified in the application, associated plans and specifications.

You must notify the Air Pollution Control Program of the anticipated date of start up of this (these) air contaminant source(s). The information must be made available not more than 60 days but at least 30 days in advance of this date. Also, you must notify the Department of Natural Resources Regional Office responsible for the area within which you are located within 15 days after the actual start up of this (these) air contaminant source(s).

A copy of this permit and permit review shall be kept at the installation address and shall be made available to Department of Natural Resources' personnel upon request.

You may appeal this permit or any of the listed Special Conditions as provided in RSMo 643.075. If you choose to appeal, the Air Pollution Control Program must receive your written declaration within 30 days of receipt of this permit.

If you choose not to appeal, this certificate, the project review, your application and associated correspondence constitutes your permit to construct. The permit allows you to construct and operate your air contaminant source(s), but in no way relieves you of your obligation to comply with all applicable provisions of the Missouri Air Conservation Law, regulations of the Missouri Department of Natural Resources and other applicable federal, state and local laws and ordinances.

The Department of Natural Resources has established the Outreach and Assistance Center to help in completing future applications or fielding complaints about the permitting process. You are invited to contact them at 1-800-361-4827 or (573) 526-6627, or in writing addressed to Outreach and Assistance Center, P.O. Box 176, Jefferson City, MO 65102-0176.

The Air Pollution Control Program invites your questions regarding this air pollution permit. Please contact the Construction Permit Unit at (573) 751-4817. If you prefer to write, please address your correspondence to the Air Pollution Control Program, P.O. Box 176, Jefferson City, MO 65102-0176, attention Construction Permit Unit.

Permit No.	
Project No.	2006-01-015

SPECIAL CONDITIONS:

The permittee is authorized to construct and operate subject to the following special conditions:

The special conditions listed in this permit were included based on the authority granted the Missouri Air Pollution Control Program by the Missouri Air Conservation Law (specifically 643.075) and by the Missouri Rules listed in Title 10, Division 10 of the Code of State Regulations (specifically 10 CSR 10-6.060). For specific details regarding conditions, see 10 CSR 10-6.060 paragraph (12)(A)10. "Conditions required by permitting authority."

Chinn Feed Mill
Shelby County, S16, T57N, R12W

1. Emission Limitation
 - A. Chinn Feed Mill shall emit less than 15 tons of particulate matter less than ten (10) microns in diameter (PM₁₀) in any consecutive 12 month period from the entire installation (emission points listed in Table 1).
 - B. Chinn Feed Mill shall maintain an accurate record of PM₁₀ emitted into the atmosphere from the entire installation. Attachment A or an equivalent form shall be used for this purpose. Chinn Feed Mill shall maintain all records required by this permit for not less than five (5) years and shall make them available immediately to any Missouri Department of Natural Resources' personnel upon request.
 - C. Chinn Feed Mill shall report to the Air Pollution Control Program's Enforcement Section, P.O. Box 176, Jefferson City, Missouri 65102, no later than ten (10) days after the end of the month during which the records from Special Condition Number 1.B indicate that the source exceeds the limitation of Special Condition Number 1.A.
2. Odor Control and Corrective Action

If a continuing situation of demonstrated nuisance odors exists in violation of 10 CSR 10-3.090, *Restriction of Emission of Odors*, the Director may require Chinn Feed Mill to submit a corrective action plan within 30 days, adequate to timely and significantly mitigate the odors Chinn Feed Mill shall implement any such plan immediately upon its approval by the Director. Failure to either submit or implement such a plan shall be a violation of the permit.

REVIEW OF APPLICATION FOR AUTHORITY TO CONSTRUCT AND OPERATE
SECTION (5) REVIEW

Project Number: 2006-01-015
Installation ID Number: 205-0022

REVIEW SUMMARY

- Chinn Feed Mill has applied for authority to construct an animal feed mill in Shelby County just east of Clarence, Missouri north of highway 36.
- Hazardous Air Pollutant (HAP) emissions are not expected from the proposed equipment.
- None of the New Source Performance Standards (NSPS) apply to the proposed equipment.
- None of the National Emission Standards for Hazardous Air Pollutants (NESHAPs) or currently promulgated Maximum Achievable Control Technology (MACT) regulations apply to the proposed equipment.
- No air pollution control equipment is being used in association with the new equipment.
- This review was conducted in accordance with Section (5) of Missouri State Rule 10 CSR 10-6.060, *Construction Permits Required*. Potential emissions of particulate matter less than ten (10) microns in diameter (PM₁₀) are conditioned below de minimis levels.
- This installation is located in Shelby County, an attainment area for all criteria air pollutants.
- This installation is not on the List of Named Installations [10 CSR 10-6.020(3)(B), Table 2].

- Ambient air quality modeling was not performed since potential emissions of the application are conditioned below de minimis levels.
- Emissions testing is not required for the equipment.
- No Operating Permit is required for this installation.
- Approval of this permit is recommended with special conditions.

PROJECT DESCRIPTION

Chinn Feed Mill is constructing a feed mill, on a greenfield site, east of Clarence, Missouri north of highway 36 in Shelby County. The facility will consist of a 80 ft x 120 ft pre-engineered metal building, a pre-engineered steal square bin system located near the center of the metal building, two exterior 25,000 bushel steel grain bins, and a 10,000 gallon heated cone bottom tank. Inside the building is an enclosed ingredient receiving driveway (120 ft x 16 ft) with overhead doors on each end. In the center is an 11 ft x 70 ft dump through truck scale. Typical ingredients (lime, dicalcium phosphate, and salt) can be received at maximum hourly rate of 45 tons/hr. Table 1 lists the facilities emission points.

Table 1: Chinn Feed Mill emission points.

Emission Point	Emission Source
EP-1	Haul Road (Gravel)
EP-2	Grain Receiving - Hopper Truck
EP-3	Storage Bins
EP-4	Headhouse and Grain Handling
EP-5	Feed Shipping - Loadout
EP-6	Electric Heated Fat Tank (10,000 gallons)

Bulk ingredients are received and transferred via conveyors to individual bins in the square bin system (14 bins). Whole grain is received and transferred to the exterior grain storage bins and then transferred to a scalper to remove objects over one half inch diameter. The grain is discharged from scalper directly into a storage bin above the two roller mills. The two roller mills have a total hourly design rate of 53 tons (38 tons and 15 tons per hour) and grinds the grain to approximately 700 micro particle size. Ground grain then is transferred into two dedicated ground grain bins.

Major bulk feed ingredients are transferred into the major scale hopper in the required amount. Minor bulk feed ingredients are routed via round spouting to a micro weighting system. Then the minor and bulk feed ingredients are then routed to the feed mixer. Choice white grease is then added to the feed at the mixer via a pump and manifold system. The feed is then mixed and discharged to a surge bin fitted directly under the mixer. The mixed feed is transferred via conveyors to load out bins located in the

square bin system directly over the center of load out driveway (six 26 ton bins, four 13 ton bins, and one cob bin). The cob bin collects oversized material from scalper. The facility will have a maximum hourly rate of 60 tons of feed per hour (tons/hr).

All conveyors, spouting, and transitions are bolted, gasketed, or sealed to prevent dusting to the atmosphere. The major scale, mixer, and surge are inter-vented to equalize air pressure and to prevent dusting to atmosphere.

EMISSIONS/CONTROLS EVALUATION

The emission factors and control efficiencies used in this analysis were obtained from the Environmental Protection Agency (EPA) document AP-42, *Compilation of Air Pollutant Emission Factors*, Fifth Edition, Section 9.9.1 *Grain Elevators and Processes* (05/03) and Section 13.2.2 *Unpaved Roads* (12/03). Potential emissions of the application represent the potential of the new equipment, assuming continuous operation (8760 hours per year). The following table provides an emissions summary for this project.

Table 2: Emissions Summary (tons per year)

Pollutant	Regulatory <i>De Minimis</i> Levels	Existing Potential Emissions	Existing Actual Emissions	Potential Emissions of the Application	New Installation Conditioned Potential
PM ₁₀	15.0	N/A	N/A	22.97	< 15.0
SO _x	40.0	N/A	N/A	0.00	N/A
NO _x	40.0	N/A	N/A	0.00	N/A
VOC	40.0	N/A	N/A	0.00	N/A
CO	100.0	N/A	N/A	0.00	N/A
HAPs	10.0/25.0	N/A	N/A	0.00	N/A

N/A = Not Applicable

PERMIT RULE APPLICABILITY

This review was conducted in accordance with Section (5) of Missouri State Rule 10 CSR 10-6.060, *Construction Permits Required*. Potential emissions of PM₁₀ are conditioned below de minimis levels.

APPLICABLE REQUIREMENTS

Chinn Feed Mill shall comply with the following applicable requirements. The Missouri Air Conservation Laws and Regulations should be consulted for specific record keeping, monitoring, and reporting requirements. Compliance with these emission standards, based on information submitted in the application, has been verified at the time this application was approved.

GENERAL REQUIREMENTS

- *Submission of Emission Data, Emission Fees and Process Information*, 10 CSR 10-6.110
The emission fee is the amount established by the Missouri Air Conservation Commission annually under Missouri Air Law 643.079(1). Submission of an Emissions Inventory Questionnaire (EIQ) is required April 1 for the previous year's emissions.
- *Restriction of Particulate Matter to the Ambient Air Beyond the Premises of Origin*, 10 CSR 10-6.170
- *Restriction of Emission of Visible Air Contaminants*, 10 CSR 10-6.220
- *Restriction of Emission of Odors*, 10 CSR 10-3.090

SPECIFIC REQUIREMENTS

- *Restriction of Emission of Particulate Matter From Industrial Processes*, 10 CSR 10-6.400

STAFF RECOMMENDATION

On the basis of this review conducted in accordance with Section (5), Missouri State Rule 10 CSR 10-6.060, *Construction Permits Required*, I recommend this permit be granted with special conditions.

Michael Sanchez
Environmental Engineer

Date

PERMIT DOCUMENTS

The following documents are incorporated by reference into this permit:

- The Application for Authority to Construct form, dated January 4, 2006, received January 9, 2006, designating Chinn Feed, LLC as the owner and operator of the installation.
- U.S. EPA document AP-42, *Compilation of Air Pollutant Emission Factors*, Fifth Edition.
- Northeast Regional Office Site Survey, dated January 20, 2006.

Attachment A – PM₁₀ Compliance Worksheet

Chinn Feed Mill
Shelby County, S16, T57N, R12W
Project Number: 2006-01-015
Installation ID Number: 205-0022
Permit Number:

This sheet covers the period from _____ to _____.
(month, year) (month, year)

Copy as needed

[illegible]

Column 1: Total amount of Feed produced during month.

Column 2: Composite PM₁₀ emission factor.

Column 3: Column 1 x Column 2 x 0.0005.

Column 4: Sum of last 12-months of Column 3*.

***A 12-Month Total PM₁₀ emissions total of less than 15 tons for Column 4 indicates compliance.**
